POWER INPUT, REVERSE-POLARITY PROTECTION, MONITOR

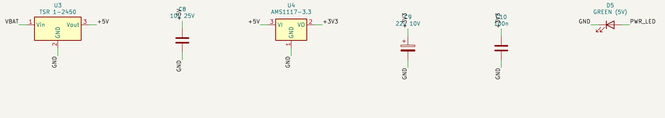

FUSED OUTPUTS

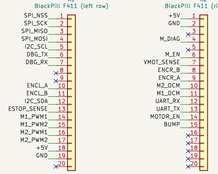

MOTOR RAIL SWITCH + E-STOP CHAIN (controlled stop, delayed cut)

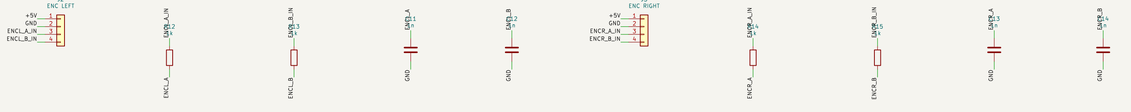

LOGIC SUPPLIES

MCU MODULE (WeAct BlackPill STM32F411CEU6, socketed)

ENCODERS

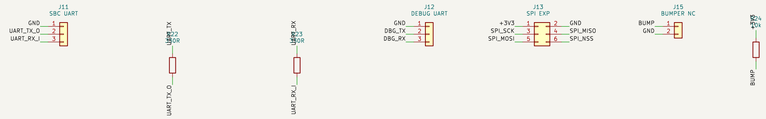

MOTOR DRIVER INTERFACE

I2C SENSOR BUS

UART / SPI / BUMPER

MECHANICAL

NOTES
1. Generated from electrical/pcb/gen/design.py — edit there and run build.sh.
2. BlackPill header order (A1/A2) must be verified against the physical module before fabrication.
3. E-stop: opening J14 pins 1–2 removes the Q2 gate drive; C3/R3 hold Q2 on ~0.3 s while firmware brakes (stop cat. 1 style).
4. KiCad GUI ERC has not been run on this sheet (KiCad 7 CLI has no ERC); see electrical/pcb/reports.
